Fragile States

Fragile States is an archive of interviews with former political prisoners who have been incarcerated for climate activism. It is an ongoing project to celebrate and financially support those who have faced retaliatory state violence for engaging in direct action.

As the climate crisis deepens, governments around the world are using every means at their disposal to crack down on protest and activism. However, in exercising their power, they simultaneously reveal their own fragility. The extreme legal and police response to climate resistance is a tacit acknowledgment of the incredible potential opened by those attempting to enact a livable future.

This work is supported by a research grant from New York University. We have redistributed these funds to pay each interviewee \$1000 for their participation. We invite others with access to academic funding to join us in considering how university resources might best be allocated in this era of crisis.

By [Sam Lavigne](#) & [Tega Brain](#), with special thanks to [Nikau](#) and [Kate Silzer](#).

Max Curmi

← Blockade Australia

My name is Max Curmi. I'm 27. I grew up in Victoria, in so-called Australia, and I've been involved in climate activism of some sort since I was a teenager. Over time I've drifted away from approaches that are appealing to the political class, towards taking part in direct action because my assessment of the situation is that the people in control on this continent have little or no interest at all in doing the responsible thing and looking after life. So, for the last five years, I have been organizing full-time on this continent, with a focus primarily on non-violent direct action in several different campaigns and movements.

Blockade Australia was set up to try to move the conversation around climate beyond the "we need to stop the next bad project," and towards the need for transformational or system change in order to respond to the crisis. You hear a lot of people talking about "the system's broken," "the system is malfunctioning," "we need to fix the system," but our framing is that it's actually not broken. It's performing exactly the way it was set up by the English when they came here to so-called Australia. For the climate movement to actually start to engage with this in an effective way we have to acknowledge the situation that we are currently facing. And it's not a couple of bad politicians or a couple of bad corporations, it's an entire economic framework that prevents change from happening. It's an extraction-based economy that is fundamentally exploiting people and the environment for as much profit as possible for the rich.

Our positioning with Blockade Australia is that we want to frame Australia as an organized system that is doing bad things. Take for example the Adani coal mine. A lot of people in the climate movement against Adani framed them as a bad company that was going to do bad things. But we want to emphasize that it's not just Adani, it's much more than just bad corporations. It's a bad system. And as everyday people, we haven't got political and legal avenues to stop the harm that's being done so we have to go and start to

APD Decruitment

<https://apddecruting.org/>

A multi-part public service campaign that aims to prevent potential recruits from joining the Austin Police Department, and to convince existing police officers to quit their jobs. Police officers are offered discounts at local Austin businesses in exchange for quitting. The project includes a website, an installation, and video featuring paid appearances by Rudy Giuliani, David Clarke, and Joe Arpaio.

A collaboration with Andie Flores, commissioned by the “It’s Not Fair” for FuseBox Festival.

Perfect Sleep

<https://perfectsleep.labr.io/>

Perfect Sleep investigates sleep and dreaming as a potential climate engineering technology. By inviting participants to experiment with their own sleep cycles, the work explores how lack of sleep and climate change are both products of the same extractivist capitalist system where regeneration, rest and natural limits go unvalued. The work is realized in two parts: as a smart phone app and an installation. The app allows users to adjust their daily schedule, slowly increasing their sleep time over the course of three years until they achieve a state of 'total sleep,' and includes a series of dream incubation texts written by Simone Browne, Johanna Hedva, Holly Jean Buck, and Sophie Lewis. In the installation the dreamscapes can be experienced from custom daybeds.

This work is a collaboration with Tega Brain, as a commission for Museum Sinclair-Haus, and received an Award of Distinction from Prix Ars Electronica.

About the listing

THE APARTMENT IS AVAILABLE.

The apartment abounds with marvelous Beaux-Arts elements, which include a unique grand circular dining room located within one of the building's iconic rounded corner towers, oversized windows along all three of the home's exposures, and herringbone hardwood flooring.

The apartment allows for a comfortable living room and formal dining room if desired, perfect for entertaining.

The apartment also boasts a galley kitchen with full-sized appliances, new lighting, hardwood floors, a walk-in entrance closet, linen closet and new thru-the-wall AC for year round comfort.

The apartment also boasts a very large coat closet near the entry, as well as a linen closet.

The apartment also boasts a washer/dryer.

The apartment also boasts an additional oversized closet and coat closet at the entryway along with a separate linen closet.

The apartment also comes equipped with an in-unit washer/dryer.

The apartment also comes with 1 parking spot.

The apartment also comes with 2 storage bins in the basement.

The apartment also comes with a large storage cage in the basement.

The apartment also comes with a storage area, through wall AC and washer dryer.

The apartment also comes with a terrific outfitted work space in the gallery and an enlarged outfitted walk-in closet in the master bedroom, as well as other tasteful built-ins, custom blackout shades and a Bosch washer and dryer.

The apartment also comes with additional storage space.

The apartment also comes with its own private storage unit.

The apartment also comes with two deeded storage rooms.

The apartment also contains an all-weather air conditioning system.

The apartment also enjoys the luxury of an in unit Washing Machine & Dryer and great attic that could be utilized as a storage space.

The apartment also features 11 ft high ceilings and a full size Samsung front load washer and dryer!

The apartment also features 9' ft ceilings in living room, oak flooring, solid wood core doors, electronic window shades, additional customized closets, a washer/ dryer, and central air.

The apartment also features 9-foot beamed ceilings and generous South and West exposures, bathing the space in natural sunlight throughout the day.

The apartment also features Bosch washer and dryer and private storage.

The apartment also features Lutron lighting, wood floors, custom cabinetry and through wall air-conditioning.

The apartment also features a 212 Sq Ft private terrace, not included in the above square footage, with breathtaking City views and lovely backlit stained glass window.

The apartment also features a Bosch washer/dryer, a generous entry coat closet, linen closet, and oak engineered wood flooring throughout.

The apartment also features a Bosch washer/dryer.

The apartment also features a Frigidaire washer/dryer set, herringbone floor, powder room, great closet space, and entry foyer.

The apartment also features a beautifully appointed kitchen, beautifully detailed hardwood floors, 10.5' ceilings, and 2 wood-burning fireplaces.

The apartment also features a butler staircase for basement access and/or yard access.

The apartment also features a customized lighting control system allowing you to set different scenes and moods, and an open chef's kitchen with beautiful appliances and granite countertops.

The apartment also features a guest powder room, a full laundry room along with 3 zones Central AC and a private storage in the basement.
